

ACKNOWLEDGEMENT

The completion of this thesis owes much support, help and understanding of many people.

I want to first express my heartfelt gratitude to my supervisor, Professor Christine Ennew. Professor Ennew gave many insightful ideas about the conceptual framework in this thesis. She taught me a lot about the writing style, helped me to refine my research design and improved the quality of the thesis. I therefore owe Professor Ennew much gratitude for her extra efforts and patience.

I would also like to send my appreciation to my other supervisor, Dr Darryn Mitussis, for giving me a lot of great advices on my writing style and the structure of the thesis.

Finally, I want to acknowledge the support I have been receiving from my family and my colleagues throughout my study. Without the help of the above people, the completion of thesis would be impossible.
