TRANSCRIPT SYMBOLS

Temporal and sequential relationships

A. Overlapping or simultaneous talk is indicated in a variety of ways.

[Separate left square brackets, one above the other on two
[successive lines with utterances by different speakers, indicates
 a point of overlap onset, whether at the start of an utterance or
 later.

] Separate right square brackets, one above the other on two
] successive lines with utterances by different speakers indicates
 a point at which two overlapping utterances both end, where
 one ends while the other continues, or simultaneous moments in
 overlaps which continue.

// In some older transcripts or where graphic arrangement of the
 transcript requires it, a double slash indicates the point at which
 a current speaker's utterance is overlapped by the talk of
 another, which appears on the next line attributed to another
 speaker. If there is more than one double slash in an utterance,

then the second indicates where a second overlap begins, the overlapping talk appearing on the next line attributed to another speaker, etc. In transcripts using the // notation for overlap onset, the end of the overlap may be marked by a right bracket (as above)

* or by an asterisk.

So, the following are alternative ways of representing the same event: Bee's "Uh really?" overlaps Ava's talk starting at "a" and ending at the "t" of "tough."

Ava: I 'av [a lotta t]ough cou:rses.

Bee: [Uh really?]

Ava: I 'av // a lotta t*ough cou:rses.

Bee: Uh really?

= B. Equal signs ordinarily come in pairs -- one at the end of a line and another at the start of the next line or one shortly thereafter. They are used to indicate two things:

1) If the two lines connected by the equal signs are by the same speaker, then there was a single, continuous utterance with no break or pause, which was broken up in order to accommodate the placement of overlapping talk. For example,

Bee: In the gy:m? [(hh)

Ava: [Yea:h. Like grou(h)p

therapy.Yuh know [half the group]p thet=
 Bee: [O h : : : .]'hh
 Ava: we had la:s' term wz there en we [jus'=
 Bee: ['hh
 Ava: = playing arou:nd.

Ava's talk is continuous, but room has been made for Bee's overlapping talk (the "Oh").

2) If the lines connected by two equal signs are by different speakers, then the second followed the first with no discernable silence between them, or was "latched" to it.

(0.5) C. Numbers in parentheses indicate silence, represented in tenths of a second; what is given here in the left margin indicates 5/10 seconds of silence. Silences may be marked either within an utterance or between utterances, as in the two excerpts below:

Bee: 'hhh Uh::, (0.3) I don'know I guess
 she's aw- she's awright she went to
 thee uh:: hhospital again tihda:y,
 Bee: Tch! .hh So uh I don't kno:w,
 (0.3)
 Bee: En:=

(.) D. A dot in parentheses indicates a "micropause," hearable but not readily measurable; ordinarily less than 2/10 of a second.

((pause)) E. In some older or less carefully prepared transcripts, untimed silences may be indicated by the word "pause" in double parentheses.

Aspects of speech delivery, including aspects of intonation.

. A. The punctuation marks are not used grammatically, but to indicate intonation. The period indicates a falling, or final, intonation contour, not necessarily the end of a sentence.

? Similarly, a question mark indicates rising intonation, not necessarily a question, and a comma indicates "continuing" intonation,

, not necessarily a clause boundary.

In some transcript fragments in your readings you may see a combined question mark and comma, which indicates a rise stronger than a comma but weaker than a question mark. Because this symbol cannot be produced by the computer, the inverted question mark

¿ (¿) is used for this purpose.

: : B. Colons are used to indicate the prolongation or stretching of the sound just preceding them. The more colons, the longer the stretching. On the other hand, graphically stretching a word on the page by inserting blank spaces between the letters does not necessarily indicate how it was pronounced; it is used to allow alignment with overlapping talk. Thus,

Bee: Tch! (M'n)/(En) they can't delay much
 lo:nguh they [jus' wannid] uh-`hhh=
 Ava: [O h : .]
 Bee: =yihknow have anotheuh consulta:tion,
 Ava: Ri::ght.
 Bee: En then deci::de.

The word "ri::ght" in Ava's second turn, or "deci::de" in Bee's third are more stretched than "oh:" in Ava's first turn, even though "oh:" appears to occupy more space. But "oh" has only one colon, and the others have two; "oh:" has been spaced out so that its brackets will align with the talk in Bee's ("jus' wannid") turn with which it is in overlap.

- C. A hyphen after a word or part of a word indicates a cut-off or self-interruption, often done with a glottal or dental stop.

word D. Underlining is used to indicate some form of stress or emphasis, either by increased loudness or higher pitch. The more underlining, the greater the emphasis.

word Therefore, underlining sometimes is placed under the first letter or two of a word, rather than under the letters which are actually raised in pitch or volume.

WORD . Especially loud talk may be indicated by upper case; again, the louder, the more letters in upper case. And in extreme cases, upper case may be underlined.

- E. The degree sign indicates that the talk following it was markedly quiet or soft. When there are two degree signs, the talk between them is
- ◦ markedly softer than the talk around it.

F. Combinations of underlining and colons are used to indicate intonation contours, as follows:

_: If the letter(s) preceding a colon is underlined, then there is an “inflected” falling intonation contour (you can hear the pitch turn downward)

: If a colon is itself underlined, then there is an inflected rising intonation contour (i.e., you can hear the pitch turn upward).

So, in

Bee: In the gy:m? [(hh)

Ava: [Yea:h. Like grou(h)p
therapy.Yuh know [half the grou]p thet=

Bee: [O h : : : .]'hh

Ava: we had la:s' term wz there en we[jus' =

Bee: ['hh

Ava: = playing arou:nd.

Bee: Uh-fo[oling around.

Ava: ['hhh

Ava: Eh-yeah so, some a' the guys who were
bedder y'know wen' off by themselves so
it wz two girls against this one guy en
he's ta:ll.Y'know? ['hh

Bee: [Mm hm?

the "Oh:::" in Bee's second turn has an upward inflection while it is being stretched (even though it ends with falling intonation, as indicated by the period). On the other hand, "ta:ll" at the end of Ava's last turn is inflected downward ("bends downward," so to speak), over and above its "period intonation."

↑ G. The up and down arrows mark sharper rises or falls in pitch than would be indicated by combinations of colons and underlining, or may mark a whole shift, or resetting, of the pitch register at which the talk is being produced.

> < H. The combination of "more than" and "less than" symbols indicates that the talk between them is compressed or rushed.

< > Used in the reverse order, they can indicate that a stretch of talk is markedly slowed or drawn out.

< The "less than" symbol by itself indicates that the immediately following talk is "jump-started," i.e., sounds like it starts with a rush.

hhh I. Hearable aspiration is shown where it occurs in the talk by the letter "h" – the more h's, the more aspiration. The aspiration may represent breathing, laughter, etc.

(hh) If it occurs inside the boundaries of a word, it may be enclosed in parentheses in order to set it apart from the sounds of the word (as in TG, 02:12-13 below).

·hh If the aspiration is an inhalation, it is shown with a dot before it (usually a raised dot).

J. Some elements of voice quality are marked in these transcripts. A rasping or “creaky” voice quality is indicated with the “#” sign.

£/\$ Similarly, a “smile voice” – a voice quality which betrays the fact that the speaker is smiling while speaking – is normally indicated with the “£” (or “\$”) sign.

Other markings.

(()) A. Double parentheses are used to mark transcriber's descriptions of events, rather than representations of them. Thus ((cough)), ((sniff)), ((telephone rings)), ((footsteps)), ((whispered)), ((pause)) and the like.

(word) B. When all or part of an utterance is in parentheses, or the speaker identification is, this indicates uncertainty on the transcriber's part, but represents a likely possibility.

() Empty parentheses indicate that something is being said, but no hearing (or, in some cases, speaker identification) can be achieved.

(try 1) C. In some transcript excerpts, two parentheses may be printed, one

(try 2) above the other; these represent alternative hearings of the same strip of talk. In some instances this format cannot be printed, and is replaced by putting the alternative hearings in parentheses, separated by a single oblique or slash, as in

Bee: ° (Bu::t.) = / ° (Goo:d.) =

Here, the degree marks show that the utterance is very soft.

The transcript remains indeterminate between "Bu::t." and "Goo:d." Each is in parentheses and they are separated by a slash.

Appendix B: Transcripts of opening questions and responses

This appendix shows transcripts of the 34 opening questions and responses analysed in chapter 5. They are organised according to the form of opening question asked, with the question highlighted in bold. In some extracts, non-vocal actions and other relevant details are indicated inside double brackets. A * indicates that the extract (or part of the extract) was also presented in chapter 5.

How are you?

36. Wife: [He's not very we:ll let let me tell you

37. Doc: [I SEE you're WEaring GLOvez.

38. Pat: Yeh err: hhh .hhh if I keep them wa:rm,

39. the pain's less .hh hhh

40. (2.7)

41. Doc: Okay

42. Pat: [I was taking Gavopentium

43. Doc: [And

44. Pat: and [er (0.4) ffhhhh I think it's bin

45. effecting me weight loss

46. (0.6)

47. Doc: as i::n [stopping the weight loss.=

48. Pat: [(So)

49. Pat: =yeh 'hh So: er: I've come off

50. Gavopentium

51. Doc: Gosh >when did you stop that?<

52. Pat: Er just above a week ago

- **Rupert DOC 13th March**

The doctor and patient are sitting down

1. Doc: **So how are you?**

2. (0.4)

3. Pat: U::m ptch (0.6) health wi:se okay,

4. (0.2)

5. Pat: I think sort uv mentally I'm a bit

Appendix C: Transcripts of crediting turns

This appendix shows transcripts of the 35 crediting turns from the doctor analysed in chapter 6. They are organised in terms of the patient's response. Verbal responses are highlighted in bold. In some extracts non-vocal actions and other relevant information are noted in double brackets. Transcripts that were presented in chapter 6 are marked with *. The final, extra, transcript is an example of crediting turns made during the doctor's letter dictations, which were not included in the analysis.

2. (0.6) from you:r point of view wha:t

↓

3. (0.9) where do you see we go from he::re:

4. Pat: .hhh

5. (0.2)

6. Pat: E::rm I ca:n't (0.3) ahm (.) really

7. happy about going to see: (0.5) the

8. nutrition[ist, to have a

9. Doc: [°Debra°

10. Pat: look at .hh what my diet i:s, to see

11. where I'm actually going wrong [becus .hh

12. Doc: [°kay°

13. Pat: I don't eat >a lot uh< dairy products, I

14. don't like them,

15. Doc: mhm

16. Pat: so I tend to ea:t quite a lot ov protein,

17. Doc: Ri:ght.

18. Pat: a:nd a lot uh veg, no:w whether I ave

19. tuh uh alter the [way I do that, I don't

20. Doc: [°Okay°

21. Pat: know.

22. Doc: Ptch .h well obviously yer very a:ctive:

23. which is >you know< a very good start un

24. it's >one of the things< Debra'll talk to

25. you about as [we:ll, .hhh and then

26. Pat: [Yeah

27. Debra's actuale:y (0.4) she's first rate,

28. Doc: >she's very< good .hh and

29. Pat: [Right

30. Doc: [so u:m .hh

31. (1.1)

32. Doc: I gue:ss (0.7) ptch a:nd and

33. she'll go over things in detail and talk

34. about portion sizes and amou:nts and so

35. on

36. Pat: [Right. Yeah

37. Doc: [.hhh U:m so: I'm sure that'll help

38. revitalise things .h is there anythi:ng

39. e:lse which you've kind uh had a (.)

40. think abou:t, anything else which i:s .hh

41. any other wayz you cun think u:f (.) in

42. terms u:v .hhh uh ways forward here?

43. Pat: .HHH I mean the last time I came in you

44. were talking abou:t the gastric band,

45. Doc: mm:hm: yes

46. Pat: I mean I've had a think about that, an I

47. wuz quite interested tu:h (0.4) listen

48. to the: gen[tleman which was just befo:re

49. Doc: [hhuh

50. Pat: [me:

51. Doc: [Rihhght.

52. Pat: .hhh so that was quite intresting,

53. so[:

54. Doc: [mhm

55. Pat: I'm still thinking >about that one at

56. the moment, I want tuh< see[: where I go:

57. Doc: [°Kay°

58. Pat: from changing my diet o:r (what ave

59. [you)

60. Doc: [O:kay

61. (0.7)

62. Pat: befo:re I mu-I make a final decision on

63. that one.

64. Doc: °Okay. °

65. (4.8)

66. Doc So there'z a bit uf cha:t (0.3) wukh goes

67. on outside is [there

68. Pat: [.E:h oh yeah ehuhuhuhuh

69. you ave to don't yuh huhuh .hhh find out

70. where you're goi:ng wro:ng huhhh

71. (3.6)

72. Doc: PTch okay. .hhh U:m (0.5) from my

73. point of view I guessuh (.)u:m (0.6)

74. you knu: it sounds as if wuh we're

75. getting the basic buh the basic

76. building blocks are falling .hh into

77. pla:suh

78. (.)

79. Doc: sort uf thing in terms of .hh

80. uh °fuh° in terms of um you seeing °uh°

81. you're seeing Debra Smith very soo:n, .hh

82. there's the issues about the: u:m there's

83. the the issues about the activity which

84. () you're going to head up

85. back towards three hours [a week .hhhh

86. Pat: [Yeah

87. the:n (0.4) the next layer above

88. that issin terms of medicatio:n .h

89. sibutramine is a relatively recent

90. change, .hh um there are other drugs out

91. the:re now, [which we can

92. Pat: [Ri:ght.

93. Doc: u:se .hh u:m fer example there:'z umptch

94. there uh THree drugs on the market,

95. sibutramine's just one uf them .hh

96. the other two: there's one called
97. orlistat >which I think you've tried in
98. the pa:st< the xenical?
99. Pat: Yes [(yes I have)
100. Doc: [Which caused problems with your
101. bowels [I think >°from what I remember°<
102. Pat: [Yes
103. Doc: .hhh a:nd the: othe:r (.) TH:ird (0.3)
104. drhug that's out there is only a
105. relatively recently released one called
106. acco:mpia or rimonabant .hh[hh
107. Pat: [Ri:ght.
108. Doc: Un what thah? (0.3) er un that .hhh erm
109. decreases your weight: (.) the: u:pside
110. to it >is that its< reasonably effective,
111. the downside to it .hh is that it can
112. cause depressio:n and it can cause
113. anxiety.
114. Pat: Ri:ght.
115. Doc: Okay
116. Doc: [Is that an issue for you?
117. Pat: [()
118. Pat: .hh Not rea:lly no.
119. Doc: O[kay
120. Pat [No
121. Doc: .hh So (0.6) if you: said tuh me uh >I I
122. I don't think we need to change it at the
123. moment as you've only bin on this dose of
124. sibutramine< uh for a couple of months,=
125. Pat: =Yeah=
126. Doc: =.hh but if you did say tuh me well

127. actually, you know I've levelled out: I'm
128. not making any difference .hh u:m I've
129. had enough of the sibutramine I'd go ye:h
130. I think that's very reasonable.= .hh Cos
131. of the three drugs the one .hh about
132. whi:ch doctors are generally most
133. CAu:tious is the sibutramine because of
134. the effect on the blood pressure and so
135. on
136. Pat: Ri:ght.
137. (.)
138. Pat: Yeh
139. Doc: whereas the: (0.3) side effects of the
140. other two: they're not plea:sant but
141. the:y (.) disappear.
142. Pat: Yeah
143. Doc: It's not gonna (suh) uh .hh (0.6)
144. Doc: but they're not particularly serious the
145. side effects.
146. Pat: Oka:y yea:h
147. Doc: Ptch °okay°
148. Pat: Ye:h something to conside:r
149. (0.9)
150. Pat: YEa:h
151. (5.4)
152. Doc: †Okay.
153. (0.3)
154. Doc: Goo:d
155. (2.0)
156. Doc: °Ptch° anything e:lse you wanted to ask?
157. Pat: °Ptch° .hhh erm? (.) Not really no:oh uh?

158. I mean I > jus wanted to know<
159. thu:t everything Was going
160. we::ll, [Buh I'm quite
161. Doc: [Mhm.
162. disappointed that I have put the weight
163. on, cos I th[ink if I'd uh
164. Doc: [mm?
165. come just before Christmas,=
166. Doc: =mhm.
167. .hh I would ave lost wei::ght.

63. (0.7)
64. Doc: mmh[:m.
65. Pat: [I've trie:d die:ts, I've tri: (0.3)
66. de:r.hhh er I did the atkins die:t u:n I
67. I did uh.hhh a sugar free die:t suh've

74. (1.0)
75. Doc: °1Okay°
76. Pat: But the:n you hear one person's .hh
77. perspective over ano:ther: some people
78. say that di:eting iz: .hhh the way
79. forward un swear by it, and other
80. peo:ple say that if you diet you just
81. .hhh e::r you're just punishing yerse:lf:

82. (.)

83. Pat: for no results, uh I dunno .hhh hh I've

85. (0.6)

86. Pat: .hhh Yuh know.

87. Doc: Ptck °okay. °

88. (0.8)

89. Pat: .hhh

90. (0.7)

91. Doc: I think?

92. Pat: .hhh

93. (1.4)

94. Doc: there're two possible (.) roads we cun

95. go do:wn two possible paths we

96. cun go down.

97. (1.0)

98. Doc: Ptck.hhhh the first

99. (0.2)

100. Pat: mmm

101. Doc: i:s to say, .hhh ↑okay we:ll you've

102. tri:ed (0.3)rimonabant, we've tri:: well

103. [we've thought

104. Pat: [.hhh

105. Doc: about trying sibutramine, you've tried

106. orlistat, you've tri:ed .hh a whole host

107. of different medications and you've tried

108. uh (1.6) different diets and so o:n

109. (0.4)

110. Doc: uh:m ptck.hh we:ll (0.3) clearly they've

111. no:t wo:rked

112. (1.3)

113. Doc: One >uv the things< we cud thi:nk about
114. doing would be: (0.5) uh would be:
115. surgery
116. (1.0)
117. Doc: .hh becus you are quite right (0.2) to:
118. identify the major issue behind the
119. diabetes, .hh as the weight. .hh get the
120. weight ri:ght, the diabetes will go
121. (alright) .hh un without getting the
122. weight right the diabetes will be very
123. difficult tuh contro:l.
124. (2.5)
125. Doc: So:, one of the things we do: fer
126. (°people °) we do sometimes do for people
127. in your situation, .hh i:s uh is goin fuh
128. ah is (.) ask.hhh (0.7) uh:m ask people
129. if they wuh want to have surgery.
130. (0.6)
131. Doc: ptck.hhh the sorts of surgery which
132. people ha:ve in this situation, .hh uh is
133. gastric banding
134. (0.5)
135. Doc: .hh sort of thing thut you see on tee vee
136. a bit,
137. Pat: [mmhm
138. Doc: [these days. Basically wha:t that
139. involves is a telescope (test) going
140. through to the stomach un putting a band:d
141. an elastic band:d >if you like< an
142. inflatable band arou:nd the stomach,
143. (1.0)

144. .hhh er this limits the amount of food
145. thut cun get into the stomach.
146. Pat: .hhh
147. Doc: kk.hhh the up side to i:t (0.4) is thut
148. it's very effective,
149. (0.3)
150. Doc: .hh in getting uh the weight do:wn
151. (0.4)
152. Doc: .h and hence actually it will improve
153. yer diabetes
154. Pat: .HHH
155. (0.4)
156. Doc: .h it will also improve the fats in your
157. bloodstrea:m, which're a:ctually at
158. fairly dangerous levels at the moment.
159. (1.3)
160. Doc: .h That's number one.
161. (0.8)
162. Pat: Ptck.hh Is there not a do:wn side to
163. ihht?
164. (1.0)
165. Doc: Yup e::rm
166. (0.4)
167. Doc: tha:t's >when I say number one< that's
168. thuf that's the [first upside
169. Pat: [Okahhuhy. Sorry .hh huh
170. sorry (go on)
171. Doc: Uh::m ptck the: other u:p side to i:t,
172. .hh um is thut .hh uh so >it makes you
173. weight [basically, and secondly it
174. Pat: [.hh

175. actually lose improves everything that
176. goes with the weight, .hhh und thirdly
177. i:t's a one off procedure, you have i:t
178. done and that's it.
179. (0.3)
180. Doc: ptck.hh the downside to it: (0.3) is that
181. it's a surgical operatio:n
182. (0.3)
183. Pat: mmm
184. (.)
185. Doc: Ptck.hhh u:nd as with any surgical
186. operation you cun ge:t (.) infections
187. (or blee:d)
188. (0.4)
189. .hhh and specific to this operatio:n
190. is that .hhh uh you need a general
191. anaesthetic, with all the risks of
192. anaestheti:c.hhh you ha:ve problems with
193. (.) uh the fact that once the band is i:n
194. .hh (0.5) it's not normally taken ou:t
195. its u:sually left in long term
196. (0.2)
197. Doc: ptck so: it's basically a one way
198. decision.
199. Pat: mmhmm.
200. Doc: ptck.hh the: other tuh the major
201. difficulty that people find, is that it's
202. that you have tuh alter your ih eating
203. habits .hhh
204. (0.3)
205. Doc: drastically. .hhh Becuz what happens iz

206. thut coz yer suh becuz yer stomach suh
207. .hhh content space is so sma:ll, .hhh if
208. you eat more than just uh little bi:t
209. you will vomit.
210. Pat: mmhmm.
211. (0.9)
212. Doc: A::nd if you do tha:t (.) long enough and
213. offen enough .hh you cun actually
214. displace the ba::nd un cause internal
215. problems.
216. Pat: °O:kay °
217. (0.8)
218. Doc: ptck so:: it's NOT something to be taken
219. lightly
220. (0.8)
221. Doc: But it is very effective
222. (0.5)
223. Doc: .hhh O:nce the band is in place, you
224. would need tuh go back (.) tuh ha:ve
225. (0.4) u:h to have the ba:nd inflated
226. or deflated at intervals
227. (2.6)
228. Doc: PTCK What're yer thoughts?
229. Pat: .hh HHHH .hh E::r hhh
230. (2.2)
231. Pat: HOw duz it weigh up?
232. (0.5)
233. Pat: I mea::n (1.4) °(I dunno maybe that)
234. sounds a bit (.) dodgy,° but uh:m .hh
235. me ptck (0.7) some good poi:nts and bad
236. you've given points but >how duh they<

237. weight up? IS .hh I:S the RIsk o:f (0.2)

238. what you just told me, the: .hh the

239. downside is it wo:rth .hh (0.4)

240. u:ndertakin: (0.2) simplify for the: the

241. benefits thut you gai:n (or [what])

242. Doc: [ptck okay

243. .hhhhh

244. (.)

245. Doc: Uh:m (.) I gue:ss I would pu I wuh tend

246. to think of it in another way.

247. (0.5)

248. thu::t the:: (0.5) if you do:n't have it

249. done: (0.2) what uh the risks and what ur

250. the benefits. .hh[h

251. Pat: [OR I know I know which

252. way it would be goi::ng

253. Doc: The: risks of no:t having it done,

254. (thut'suh)

255. Pat: mmm.

256. Pat: [Is far greater than ()

257. Doc: [You're very familiar with all of them.

258. .hhh um und the risks o:f having er of

259. (0.4) sorry the benefit of not having it

260. done, is thut you avoid the surgery.

261. Pat: Yeah. .hhhh

262. Doc: So on balance there is kwuh (0.4) thur is

263. quite a: (0.7) quite a lot of adva:ntages

264. to it .

265. Pat: P.hhh

266. Doc: BUt (.) they only apply: if yer able

267. to be very disciplined with your diet,

268. Pat: mm:hm.

269. Doc: If yuh have long term commitment to

270. see it through.

271. (0.9)

272. Doc: .hh if >you say to me< we::ll I'm not

273. really that concer I don't >really mi,< I

274. don't really want to change things .hh if

275. (.) yuh know, if someone says tha:t to:

276. me,

277. Pat: .hh[h

278. Doc: [then I sa:y [that's not fer you.

279. Pat: [Ah

280. Pat: We:ll that's tha:t's notuh thu:h thoughts

281. going in my mind. .hhh [see in my mind uh

282. Doc: [° Right. °

283. Pat: I I want this weight off: .hh I want if

284. off long term,

285. Doc: ° mhu:h°

286. Pat: .hh e:r I don't want it back I mean uh

287. I've .hh I've been friends with it for

288. tweny fihhve yea:rs, I wan it to get ou

289. no:w

290. Doc: m[m.

291. Pat: [.hhh you kno:w it's li:ke that

301. (0.3)
302. Doc: a:h to: go down the surgical (0.2)
303. surgical o:ption .hhhh the †other option
304. we cun think abou:t, .hh um i::s uh i:s
305. (0.2) changing the insulin agai:n, what I
306. would want to do is give you a more
307. concentrated form of insulin .hhh [FIVE
308. Pat: [mmhm.
309. Doc: times the stre:ngth so you've only
310. have to take a fifth as much

318. The: uh other things we cou:ld do: (0.6)
319. ptck
320. Pat: .hhhh
321. you know we wuh trea: (0.5) one of the

258. yer [blood perssure right.

259. [Yeah

260. Doc: .hh yer >blood pressure's< pretty goo:d

261. so that [leaves us with your blood

262. Pat: [mm

263. Doc: sugars, .hhh uh:m (0.4)

264. Pat: What were the last ones? ()

265. Doc: Thuh well I don? (0.2) Have you had any

266. done recently?

267. Pat: No: I hah I han I literally had them done

268. the day I first seen you

269. Doc: °Right°. The BLO:od SUGars when you came

270. wuh-were actually pretty good.

271. Pat: Ri:gh[t.

272. Doc: [Um But obviously I've I've I don't

273. have any [up to date ones.

274. Pat: [Yea:h

275. (.)

276. Pat: °Righ°

277. Doc: .HHH The: the thi:rd issue is we:ll okay

278. that's all very well, what's going to

279. happen with the diabetes in the long

280. te:rm if we jusst carry on as we are.

281. Pat: Yeah

282. Doc: What will happen is that gradually

283. the sugars will cli:mb .hh will becumuh
284. (.)wull (.) climb higher and higher becus
285. that's the natural pu-progression (°uv°)
286. diabetes.
287. Pat: Yep
288. Doc: .hh the only thing which realistically
289. slows it do:wn that we kno:w of, (0.7)
290. i:s to control thuh weight
291. (0.4)
292. Pat: Ptck ri:ght.
293. Doc: Tch So: I THi:nk you've actually done
294. really well, becus yuhv actually got a
295. number uv (0.3) number of the steps
296. sorted out already,
297. Pat: Ri:ght.
298. Doc: .hh buh the next >one thu< we need to
299. address is the weight.
300. (0.5)
301. Doc: Ptck.hhh
302. (0.4)
303. And what conce:rns me is we've been kind
304. uv (.) trying to do that, but we haven't
305. rea:lly been making progress wi[th it
306. Pat: [.hh Yeah
307. (0.5)
308. ?Pat: (muhmum)
309. (0.6)
310. Doc: .hhh an:d what WO:rries me is that you'll
311. co:me back next time, you'll say to me::
312. (.) you know, yes (bluh bluh blu:h)
313. (1.0)

314. Doc: had un had an eye appoint[ment,

315. Pat: [°Yeah°

316. Doc: and things were oka:y, un .hh din't go to

317. the gym for a bi:t, buh you kno:w, .hh it

318. was difficult to arra:nge becus .hh

319. actually it was very difficult [because

320. Pat: [°Yeah°

321. Doc: of the schoolsit was the school holidays

322. u:nd er because the schools (being)

323. () in the holidays,

324. but actually .hh you know it was just

325. it kind the easter holidays, en then

326. after that of petered out becus [they.

327. Pat: [mmm

328. Doc: came back again.hh you know that's wha:t

329. I really need to do, I really need to go

330. to the gym doctor Lin, uh I really

331. nee-.hh and WI:th that I know I can

332. lose wei:ght.

333. Pat: [Yeah

334. Doc: [Next time, >you know< this isuh .hh

335. we're in june:

336. (0.3)

337. Doc: uhm I said that back in march hhh

338. [but you know I know we're in ju:ne july:

339. Pat: [Yuh

340. Doc: no:w but it's summer holidays soon I I'll

341. I will lose weight again, be su:mmer I'll

Appendix E: Transcripts of closings in the fieldwork consultations

This appendix shows the full transcripts of closing sequences in the fieldwork consultations. Extracts a and b are extended examples showing how a closing relevant environment is built up towards the end of the consultation. The remaining extracts are organised according to which actions initiate a move into closing. Highlights in bold show the verbal turn which is responded to by the patient with preparations to take leave of the doctor and exit the room. In some extracts, non-vocal actions and other relevant details are indicated inside double brackets. A * indicates that the extract (or part of the extract) was also presented in chapter 8.

The doctor and patient have agreed to some small changes to the patient's diabetes medication but that it is mostly under control. They have also agreed that his main issue to tackle is his weight, but that, due to certain pressures he is not able to undergo regular weight loss behaviours at the moment. They have agreed that he will be discharged from the clinic, but that if he feels he needs more specialist help he will contact his GP to arrange another appointment. The patient has just been talking about wanting to lose weight but not having time.

The patient talks some more about the video, then he and the doctor exchange greetings and they leave the room.

- **Becky WMC 10th Jan** (* extract 6 in chapter 8)

The patient has recently had gastric band surgery in Cleedon. The patient has agreed a next appointment date with the doctor, discussed what will happen at her surgical follow up appointment and agreed in principle to the idea of joining a support group for people looking for surgery.

1. Doc: Have I got your conta:ct ()

29. Doc: [Be even more impressive Becky.

The patient makes further jokey comments about her surgery, shows the doctor her scar and leaves during closing greetings.

- **Becky WMC 13th June**

The patient has been upset throughout the consultation as she feels she has not lost much weight since her bariatric surgery. When she heard that the clinic was closing, she became very upset. She and the doctor have discussed possibilities that she can see him in Cleedon and she has asked him whom she should send a letter of complaint to about the clinic closing. She has just said that she will write to the top, 'Tony' and the doctor has replied that Tony won't be around for much longer.

1. Pat: **No:: Go:rdon then: if ee wants me**
